

Visionary Force- ICAT Creativity + Innovation Day May 4, 2020

Welcome, students! We are glad you are present for this event.

Please Interact with Presenters

Typically this type of event is a face-to-face, expo style event; however this year it is virtual. This is a new space for many. As you explore the online features, please reach out and interact with the presenters.

Feel free to ask any questions that come to mind while exploring their work, such as:

- How did you initially become interested in this topic?
- Where did you learn the skills needed for this project?
- What was the hardest part of your project process?
- What else are you interested in exploring?
- What academic subjects did you use for this project?
- What was most surprising as you worked on your project?
- Did everything work as planned on the first attempt?

Tips For Attending a Professional Event...

During this event, many people will be present including college students, professors, and staff, and community members. Since this is a professional event...

- Please dress and behave respectfully, representing yourself and your school well.
- Arrive to scheduled events on time. The 1:00 live stream event and 2:00 panelist discussions are time sensitive.
- Be attentive and present; take advantage of the experience!
